

Sea Battleship

Online!

Instructions

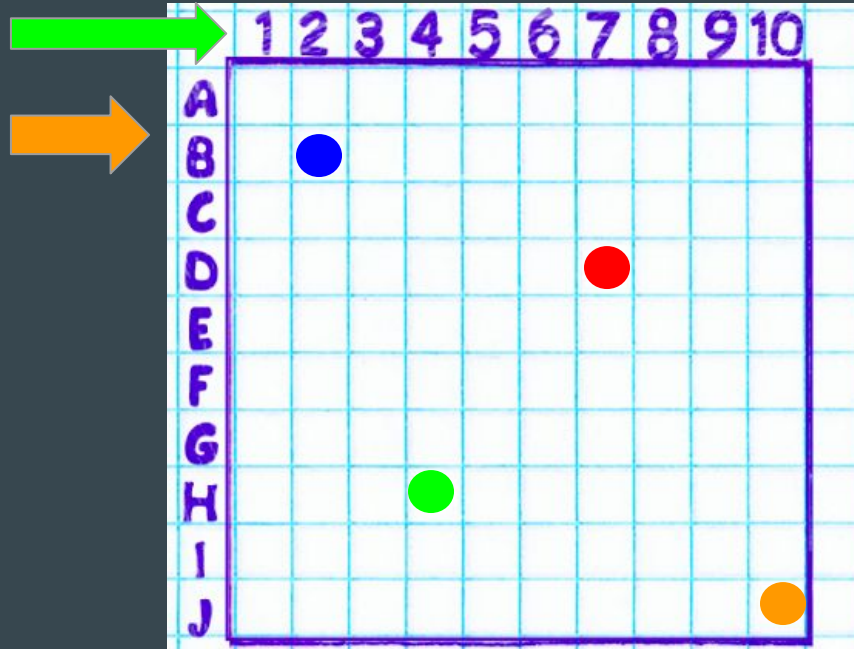

The goal of the game is to guess where your opponent hid their 10 boats. Click on a square to see if you hit your opponent's boat.

Can you find their boat faster than they find yours?

But first! You must learn about coordinates!

Coordinates are used to indicate a point in the graph

We say the
number
first
(x-axis)
then we
say the
letter
(y-axis)

Let's practice!
Where is the...
Red dot?
Green dot?
Orange dot?
Blue dot?

Now you are ready!
